GOOD NEWS FROM BLACK BASS TIME DOUBLE TROUBLE

New Jersey Fish Commission In New Jersey a Day Earlier; Discovers Fine Stream and Stocks With Trout.

Double Thouble, N. J., June 1.—Good news from Double Trouble! The Board of Fish and Game Commissioners has discovered a really fine but neglected trout stream and stocked it. The stream rises in Mount Misery.

discovered a really fine but neglected frost stream and stocked it.

The stream rises in Mount Misery. I am eager to tell you the best time of all for fly fishing for the large mouths. It comes right after a warm. light empties into the Atlantic between Toms River and Forked River. The trout brook is Cedar Creek and was discovered by Ernest Napier, president of the commission. Such a find was it that he put in last year 500 two-year-old trout, observed that they made good and this have wings) and with all haste get busy before the rain has pussed. observed that they made good and this year had a carload (2,500) of two-year-

observed that they made good and this year had a carload (2,500) of two-year-old brown trout put in and now the sport is open to all anglere for balt or fly casting.

Double Trouble may cause a chuckle and some doubt, but just as sure as there is a Hell-for-Sartin creek in Kentucky there is Double Trouble in New Jersey. Indeed Edward Crabbe and H. Scammell are in business there and have had good luck, so much so that have had good luck, so much so that Mr. Crabbe saw no reason why they should not call their cranberry and kineberry business and their other industries the Double Trouble Company. The Double Trouble Company has a rating in Dun's and Bradstreet's.

Mow Beable Trouble Got Name.

"How did Double Trouble receive its name?" repeated Mr. Crabbe "Good Luck, further down from Double Trouble, was the birthplace of the Universalist Church in America, in 1770. The clergyman who established the Universalist Church built a dam at this point and the beavers and musk-rats, according to the story, broke through the dam and when the rector came up to inspect it and saw the have wrought he remarked: "More trouble, double trouble." The name stuck. If you will look at the topographical maps of New Jersey you will see Double Trouble indicated. I have looked back over records in Perth Amboy and I find Doub'e Troubie mentioned in deeds as far back as 1790.

"How Good Luck Point got its name is also interesting. In the Revolutionary was Col. Coates for whom Coates Point into the lake, so that the riffes are

I find Doub'e Troubis mentioned in deeds as far back as 1790.

"How Good Luck Point got its name is also interesting. In the Revolutionary war Col. Coates, for whom Coates Point is named, was aimost captured by the British but he spurred his horse and the animal swam from Coates's Point to a landing which he called Good Luck Point, where he made his escape. It is called Good Luck Point to this day."

Now begin to move them. Where the calm water at the end of the riffes lies.

the animal swam from Coates's Point to a landing which he called 'Good Luck Point.' where he made his escape. It is called Good Luck Point to this day."

Geose Companion of Anglers.

Cedar Creek is most attractive to the angler at Double Trouble, where it flows through the cranberry bogs and is an open stream for a couple of miles until it finally meanders through the estar woods, where casting the fly maturally is more difficult than in the open. The stream is known to only a few anglers as a pickerel stream, because of its inaccessibility, ye. Mr. Samas's father landed a ten inch trout the other day and the next trout that coate the fly many and the mext trout that coate to his fly smashed his leader and having only one leader with him, he was unable to "come back."

IMPROVE TROUTING

Says Adirondacker; August Should Be Cut Off.

REASONS FOR CHANGES PLANTED BY THOUSANDS

ELISABETHTOWN, N. Y., June 1.—'The situation on trout fishing is improving,' said an angler who has spent his boyhood and manhood in the Adirondacks to a Sun reporter to-day. 'Prior to three years ago we had a series of dry years and the little feeder brooks dried up. Three years ago this spring we began to have more water, and the result is that the little feeder brooks filled up and we are now setting better "Dry seasons slways produce poor

fishing. The improvement has come within two years. There are millions of trout in these small streams and proper protection is given to them the results will be cumulative. "The Brown's Track Guide Associa-tion in the neighborhood of Fulton Chain for fifteen or twenty years have been keeping closed small forks for a continuously closed season. These small streams where the trout live and

small streams where the trout live and develop ought to be protected throughout the State. Sportsnien are the ones it be the brook trout, they will do equally to do it. They should appeal to the
Conservation Commission to close certain streams, and in that way they
can increase the supply of big fish. If
this should be done it would do more
than any other things to increase the
supply of trout in our State waters.

Tront Season Too Long.

"Incidentally our trout season is too long. The latter end of it should be cut off. Trouting through August should not be permitted. The trout start spawning before the season is over on August 31, and moreover, by the time in some of the mid-Western States attains a weight of twenty pounds. In Michigan, from which State New gust are the brood stock. We ought to have the month of August taken off the hatchery here, rainbows have the trout law in order to care for the future supply. spawning before the season is over on

future supply.
"While the State Conservation Comnission is doing everything possible to necesse the supply of trout in our you cannot make much headway if the brood stock are depleted. Also the Conservation Commission cannot begin to stock all the State trout waters. No brook trout should be fished for after July anyway unless it is a stocked stream and stocked that year. Whenever a stream is not stocked fully in the same waters with other treated in wild life are welcome. Answers to is owned by Charles M. Ams of New York city and contains a tract of three or four square miles of splendid game country, with a take a mile long and smaller ponds and smaller automatically cease on July 1 to give

the fish an opportunity to increase. If a stream was stocked of course it would not have to be closed on July 1. "During July and August the brooks "During July and August the brooks and streams are low as a rule and it is the easiest matter in the world by jigging, tickling and snaring in addition to other illegal methods to take trout. Stopping fishing during August would be a great protection for the trout, for it would make enforcement of the law easy, for it is only when streams are low that the fish can be taken by these illegal methods, familiar, if not practised, by small boys and poachers and others who have no regard for the law."

game destroyers during the winter.
"We are satisfied that some of them do not know how to trap vermin, but

they could learn.
"We are also satisfied that few if any of them hanker to spend eight or ten weeks in the woods in midwinter, but much as they may love a warm fireside, the movies and their families duty is calling them to meet game's greatest enemies, at the place where games is be-ing destroyed, at the time the destruction Those caught with the net are generally

ble to keep the herds in existence

Boston, Mass. June 1.— The nest-ing season of the birds has arrived Whether or not there will be the desired increase in birds this season depends very largely on the protection which will be received by the adult birds during the hatching period and the young birds until they can fly and have learned to shift for themselves," says a poster issued to-day by the Commissioners of Fisheries and Game.

"One of the greatest menaces to the bird life of the country to-day is the house cat," continued the poster. "There are very few cats which, if given the opportunity, will not kill a mother bird on the nest or a helpless fledgling fluttering around on the ground. The great tragedy is as likely to ocur in the clematis along the porch, o in the flower garden, as it is in the re

mote places frequented by the so-called wild hunting house cat. "This is no attempt to indict the cat.
We have great sympathy for and appreciation of the affection between tably and her owner. We are simply usking that at this crucial period the birds be given all benefit of the doubt.
"We earnestly ask the owner of every house cut during the next three months

to assume the responsibility of seeing that the cat will not be given an opportunity to kill birds. "The country is at war. To win th war we must have food. It is common knowledge that the birds are a tremen-dous factor in the protection of the food supply from insects. Cats if unrestrained, especially at this season, wi
